EDUCATION

University of Nebraska-Lincoln Lincoln, Nebraska
B.S. Honors: Computer Science, Mathematics, and Data Science May 2028 | GPA: 3.95/4
Relevant Coursework: Machine Learning, Data Analysis, Software Engineering, Data Structures and Algorithms

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL, C++, C#
AI/ML: PyTorch, Machine Learning, Evaluation Metrics, LLM APIs, Prompt Engineering, Agentic AI
Engineering, Data, and Cloud: React, Next.js, Spring Boot, REST APIs, Git, DynamoDB, MongoDB, Firebase, AWS Lambda

EXPERIENCE

Lockheed Martin Omaha, Nebraska
Software Engineering Intern May 2026–Present

- Developed mission-critical full-stack capabilities for a classified U.S. government program using React, TypeScript, Spring Boot, and MongoDB.
- Prototyped, implemented, tested, and deployed production features used daily by more than 100 technical users.
- Served as Intern Software Lead, coordinating technical work, reviewing pull requests, documenting decisions, and collaborating with engineers on implementation.
- Granted an active Top Secret Security Clearance to support classified U.S. government programs.

Aviture Omaha, Nebraska
Software Engineering Intern May 2025–August 2025

- Analyzed and optimized DynamoDB retrieval queries, improving a production workflow's performance by 400x.
- Integrated full-stack features into a U.S. Air Force application using React, JavaScript/TypeScript, and AWS Lambda backend services.
- Built and maintained application functionality supporting a recruiting platform with more than 1 million downloads across mobile app stores.

University of Nebraska - Lincoln Lincoln, Nebraska
Technology Support Intern April 2025–Present

- Diagnosed software, hardware, network, and account-access issues and documented solutions for students and faculty.
- Supported data and account migrations across 5 university departments while adapting solutions to user and process needs.

Headstarter AI Virtual
Software Engineering Fellow July 2024–September 2024

- Built three AI-enabled web applications using Next.js, Firebase, and MUI, implementing front-end interfaces and backend functionality.
- Integrated LLM APIs, refined prompts, and validated AI-enabled features to improve response usefulness and user experience.

TECHNICAL PROJECTS

Vex U Robotics Lincoln, Nebraska
Programmer August 2024–May 2025

- Improved robot-control latency and synchronization by 15% using C++ algorithms and the VEX V5 API.
- Documented experiment results, system behavior, implementation changes, and troubleshooting findings for the project team.

NASA SUITS Lincoln, Nebraska
Programmer August 2024–May 2025

- Prototyped augmented reality interfaces that visualized telemetry data in simulated space environments.
- Validated UX workflows through user testing and feedback, iterating on features for high-stakes simulated environments.

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

National Society of Black Engineers Lincoln, Nebraska
Senator August 2025–Present

- Represented 50+ members in chapter meetings and contributed to decisions on initiatives, events, and policies.

Management Leadership for Tomorrow Virtual
Career Preparation Fellow January 2025–Present

- Selected for an 18-month professional development program and completed the Dell Technologies x MLT Prompt Engineering Cohort focused on practical LLM prompting and applied AI concepts.

Other Involvements: Honors Program, NACME, Color Stack, Afrikan Peoples Union, African Student Association

CERTIFICATIONS

Dell Prompt Engineering Achievement Version 1.0 — Dell Technologies Aug 2026
IBM Data Analyst Professional Certificate (V3) — Coursera Dec 2025
